**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Marchwiak et al in view of Swinford et al.

There is disclosed in Marchwiak a roasting apparatus, comprising: a roasting pan 10; a roasting rack 12; an endless outer member 30 in the roasting rack adapted to fit within the roasting pan; a plurality of support members 36 spanning a plurality of side sections of the endless outer member; a pair of rack handle members 40 extending from the roasting rack; and means 50 for suspending and securing the roasting rack.

Swinford discloses the use of roasting pan handles 32 arrayed perpendicular to a first axis of the roasting pan. It would have been obvious to one skilled in the art to provide the roasting pan of Marchwiak with the handles disclosed in Swinford, in order to provide a more safe means of handling the roasting pan.

***Allowable Subject Matter***

Claims 8-14 are allowed.

Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Buff is cited for its disclosure of the state of the art.
